Re: Integrated science learning progress in the school suspension period

Dear students,

With the Covid-19 epidemic ravaging worldwide, the society has come to a standstill. It is of utmost importance that as teachers and students, we waste no time while the epidemic is not going to end in the near future.

During the school suspension period, we will continue to learn through online materials so that we may catch up with our original learning progress as far as possible.

1st phase:	3/2	to	4/3
2nd phase:	5/3	to	15/3
3rd phase:	16/3	to	29/3
4th phase:	30/3	to	19/4

Accordingly, your IS teachers will release online learning materials in phases through various channels such as eclass, email, wechat... and whatever ways we can reach out to you. In order to encourage continuous learning, teachers will also give online exercises and quizzes and students are required to submit their work according to the schedule on the next page.

Your performance in areas 1. submission of online assignment, 2. online quizzes and, 3. back to school quiz will constitute 15% marks in your final examination.

Seek help from fellow classmates and your teachers if you experience difficulties in learning or assessing the online materials. If you have any good ideas about learning science better during the school suspension time, don't hesitate to share them with your teachers.

Let's don't waste today worrying about tomorrow!

Best regards

Mr. WK Leung
